

~~YUM ONE~~
AND DONE.

Protecting your dog from
all these nasty parasites
couldn't be easier.

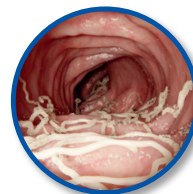

FLEAS

TICKS

LUNGWORM

ROUNDWORMS

You need to protect your dog **inside and out**

LUNGWORM

Lungworm is increasingly common¹⁻⁴, and can cause serious health problems for dogs, which can be fatal.⁵

Your dog can pick up lungworm by accidentally swallowing slugs and snails or even just drinking contaminated water.⁵

In order to prevent lungworm disease you need to protect your pet using a suitable product every month.⁶

FLEAS

Your dog can get **fleas** at any time of the year, causing intense irritation, itchiness and skin problems.¹¹

Not only that! Every single female flea can lay up to 50 eggs a day.¹² Multiply that by the fleas on your dog and that's thousands of eggs in a month – with most of these falling off your pet and contaminating your home and carpets.¹¹

Preventing your pet from getting fleas is the best way to stop this happening.

ROUNDWORMS

Roundworms can live inside dogs for years, with eggs found in areas that dogs walk every day since they are passed out in their poo.

Roundworms can also infect people and can be associated with epilepsy, asthma and reduced learning ability in children as well as causing blindness.⁷⁻¹⁰

To stop eggs being laid and passed on, roundworm prevention needs to be given every month.⁶

TICKS

1 in 3 dogs carries **ticks**¹³ but they are often hard to spot.

Ticks feed on dogs for days causing discomfort and sometimes passing on serious infections such as Lyme disease.¹⁴

Using a product to kill ticks quickly will reduce the risk of these diseases being transmitted.¹⁵

Your vet can prescribe a simple, monthly, tasty chew that's as easy as giving your dog a treat. YUM AND DONE!

YUM ~~ONE~~ AND DONE.

You can protect your dog by simply giving them one tasty, monthly chew. What a treat that is, for you and your dog!

Your dog's happy because you've rewarded them with a tasty treat. You're happy because they loved getting protected for another month.

Yum and done!

Ask your vet about parasite protection in a tasty, monthly chew.

They know how to provide optimum protection with minimal fuss that dogs love to take and you will love to give.

HAPPY DOG. HAPPY OWNER. HAPPY VET.
